SPONSORSHIP PROSPECTUS

PRESIDENT'S WELCOME MESSAGE

Dear Colleagues,

It is a great honor and pleasure to welcome you, on behalf of the World Society for Forests and Parks for Public Health, to the 5th Conference on Forests and Parks for Public Health, held from 8 to 11 October 2027 at Nippon Medical School in Tokyo, Japan.

Over the years, our conferences have contributed to a growing understanding that forests and parks are essential for supporting human health and well-being. Research has shown their positive effects on physical health, mental balance, social cohesion, and overall quality of life, confirming that access to forests and parks is a vital component of health promotion and disease prevention.

This conference places a special session on the health effects of forests and parks on children. Early life exposure to nature supports physical development, emotional stability, and cognitive growth. These benefits are aligned with recommendations in WHO guidelines on child health, highlighting the importance of safe and equally accessible green spaces for healthy development.

Forests and parks also generate combined social and economic benefits for public health. They provide spaces for community engagement, physical activity, and social interaction, while their preventive health effects can reduce the burden of disease and contribute to more sustainable healthcare systems. By offering both health and social value, forests and parks are integral to creating resilient, inclusive, and health-thriving communities.

The World Society for Forests and Parks for Public Health brings together scientists, health professionals, policymakers, and community leaders committed to advancing knowledge and practice at the intersection of nature and health. We warmly invite scientists and researchers from all fields to join us, share their expertise, and contribute to this vibrant global community. Through research, advocacy, and international collaboration, the Society promotes the integration of forests and parks into public health strategies worldwide.

Japan, with its rich cultural relationship to nature and its leadership in forest medicine and preventive health research, provides an ideal setting for this conference.

We are deeply grateful to our Japanese colleagues, from INFOM and the Japanese Society of Forest Medicine, for their dedication and effort in organizing this conference and to Nippon Medical School for hosting this important global scientific event. Their commitment has made it possible to host this event in such an inspiring and welcoming environment.
It is with great pleasure that we warmly welcome our colleagues from around the world to join us at this conference. May this conference inspire new knowledge, foster collaboration, and strengthen the integration of forests and parks into public health practice and policies.

I wish you a successful and rewarding conference in Tokyo.

With warm regards,

Dr. Christos Th. Gallis
President,
World Society for Forests and Parks for Public Health.

ORGANIZING COMMITTEE PRESIDENT'S WELCOME ADDRESS

Dear Colleagues and Friends,

It is our great pleasure to invite you to the 5th World Conference on Forests and Parks for Public Health (WCFPPH 2027), taking place from 8-11 October 2027 at Nippon Medical School in Tokyo, Japan (https://www.nms.ac.jp/college/).
Nippon Medical School was founded in 1876, is the oldest private medical school in Japan, and located in central Tokyo, next to the famous Nezu Shrine and the University of Tokyo. There are many beautiful urban green parks in Tokyo.

Under the theme "Forests and Parks for Public Health", WCFPPH 2027 will bring together scientists from academia, industry, and regulatory bodies and researchers and practitioners of forest therapy/forest bathing/Shinrin-yoku to exchange knowledge, strengthen collaborations, and explore the latest advances in Forests and Parks for Public Health, Forest Bathing/Shinrin-yoku/Forest Therapy, Forest Medicine and related disciplines.
Forest bathing/Shinrin-yoku as a healthy lifestyle was originally proposed in Japan in 1982 for the purpose of reducing stress and health promotion. Since 2004, serial studies have been conducted to investigate the effects of Forest bathing/Shinrin-yoku on human health, many scientific papers have been published and Forest Medicine as a new preventive medicine was established. It has been reported that Forest bathing/Shinrin-yoku boosts immune system; reduces mental stress, blood pressure, heart rate, and the activity of sympathetic nerves; increases the activity of parasympathetic nerves, improves sleep and shows preventive effects on lifestyle related diseases.

The Conference is co-organized with the Japanese Society of Forest Medicine (https://forest-medicine.jp/) and the International Society of Nature and Forest Medicine (INFOM, https://www.infom.org/).

Join us in Tokyo for inspiring scientific and social programs, thought-provoking discussions, and excellent networking opportunities in one of Asia's most vibrant and beautiful cities.
Join us in Tokyo to enjoy the delicious, healthy Japanese food, sushi, sashimi, and more. There are 65 forest therapy bases in Japan (https://www.fo-society.jp/en/index.html), please enjoy the Japanese forest bathing/Shinrin-yoku/forest therapy and hot springs in the beautiful forest therapy bases during the conference.

We look forward to welcoming you to WCFPPH 2027 for an unforgettable Conference experience!

Warm regards,

Prof. & Dr. Qing Li
President of the Organizing Committee of the 5th World Conference on Forests and Parks for Public Health
Clinical Professor of Nippon Medical School, Tokyo, Japan
President of the Japanese Society of Forest Medicine
Vice president of INFOM (International Society of Nature and Forest Medicine)

FPPH 2025, Luxembourg

THE CONFERENCE

Urbanization and modern lifestyle changes have reduced the opportunities for human contact with nature in many societies. At the same time, many societies are now facing increasing incidences of poor physical and mental health associated with chronic stress, insucient physical activity and exposure to man-made environmental hazards, which cannot be addressed by medicine and technology alone.

In addition, urban and ex-urban forests and green spaces can provide walkways and spaces for nature-based activities, which can have not only preventive eects on lifestyle-related diseases, but also improve people's health in general. For these and other reasons, therefore, public health interventions should take into account the value of forests and green spaces in urban planning and design.

A key message is that cities can enhance public health through urban green Design. The aim of this conference is to bring together renowned scientists from dierent countries and disciplines to present research and current knowledge and theories on:

1. The importance of the role of forests and green spaces in improving the health and well-being of a population.
2. The challenges facing the elds of urban and landscape planning in designing green infrastructure that benets natural activities in both urban and forest/nature settings.

THE VENUE

Nippon Medical School

Nippon Medical School is Japans oldest private medical school, its precursor, Saisei-Gakusha, having been established in 1876. Guided by its founding principle, Saisei-Kyumin (to save people everywhere), and a credo embracing Kokki-Junko (to dedicate oneself to public service), for 140 years Nippon Medical School has focused on ensuring that its graduates are equipped with ideals and qualities embodying these concepts. Moreover, the school boasts a long-standing tradition of fostering a culture of free academic inquiry.

THE CITY OF TOKYO

As Japan's capital and the world's most populous metropolis, Tokyo offers tradition and innovation, and unlimited opportunities to eat, shop and explore.

Tokyo is located on Tokyo Bay in the Kanto region of Honshu, Japan's largest island. The closest airport airports are Haneda officially known as Tokyo International Airport, and Narita Airport, Japan's largest international airport. Tokyo is known for its fashion and shopping, from the trendy shopping districts of Harajuku and Shibuya, to the luxury flagships of Ginza.

Shinjuku is the thriving business district; a mix of gleaming skyscrapers and atmospheric back streets with tiny bars. Asakusa is the heart of Tokyo's downtown, with ancient temples and traditional stores. Tokyo is a foodie paradise with more Michelin-starred restaurants than any other city in the world, along with hundreds of cheap and delicious ramen shops.

MAIN TOPICS

The main thematic topics of the 5th World Conference on Forests for Public Health are as follows:

- Forest medicine, effects of Forest bathing (Shinrin-Yoku) on human health, forest therapy, green care.

- Environmental epidemiology, health geography, Global health issues of public health and green spaces, and other disciplines are involved in documenting the associations that forests, parks and green spaces have with public health outcomes.

- Mental health benefits of exposure to nature and green spaces Environmental psychology and other disciplines are involved in formulating and testing theories in mental health benefits of exposure to natural settings.

- Planning physical activities and access, health promotion, recreation planning, nature-based tourism, and other disciplines involved in designing programs and settings in which individuals, small groups, and general public can visit and experience forests, parks, and green spaces.

- Urban forests and parks, their ecosystem services for Public Health (heat, air pollution, noise, etc., natural immunity included) and their effects on human health.

- Urban forestry, urban planning, landscape architecture, ecology, conservation biology, and other disciplines involved in green spaces planning and design for Human Health activities, availability, and accessibility.

- Public health policies, public health economics, political science and governance, social cohesion and inclusion, and socioeconomic aspects in Forests, Parks and green spaces for Public Health.

- The Role of Forests and Parks in Promoting Children's Health and Development.

WHY SPONSOR?

As a valued Sponsor or Exhibitor at the 5th World Conference on Forests & Parks for Public Health, you will be able to:

> Participate in a in a leading international event and contribute to the success of the Conference

> Gain significant brand exposure to researchers and organizations related to your field

> Showcase your business in the combined exhibition and refreshment (Coffee Breaks) area for maximum exposure

> Increase awareness and exposure of your business via a variety of digital and printed marketing tools

> Develop business connections and strengthen relationships through face to face engagement

> Exhibit and generate new leads, develop your brand or launch a new product through the exhibition

> Maximize your time and resources by showcasing your company to a relevant and influential audience in an environment away from the competition of everyday distractions

*** Promotional Spot must be provided by the Sponsor*

ADDITIONAL SPONSORSHIP OPPORTUNITIES

Exhibition

Exhibition Booth Space	6m² €2.000	3m² €1.200
Free Registrations for Exhibitor Representatives	2	1

Mobile Application Sponsor €3.000

We offer the unique opportunity to become the Exclusive Mobile Application Sponsor of the Conference.
The Company's logo will be displayed at the center of the homepage of the application, covering 20% of the screen.

The package includes:
1. Exclusive promotion of the Sponsor inside the Mobile Application
2. Linkage to the Sponsor's Website or any relevant website upon request
3. Two Push Notifications to all participants with content chosen by the Sponsor, during the Conference

Conference Material Sponsor - 300 pieces

Conference Bag / Folder	€2.000
Conference Notepad	€1.200
Conference Pen	€900
Conference Lanyard	€1.500

Advertising Spreads in the Digital Abstract Book*

Double Spread	€1.000
Back Cover	€1.300
Inner Front Cover	€1.300
Inner Back Cover	€1.100
Full Page	€700

**the sponsor provides only the logo to be printed.*

Promotional Material (Flyer, Brochure, Leaflet) - 300 Pieces
